### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims

Claim 27: line 18, --track comprises-- has been inserted after "said" first occurrence; "comprises" has been changed to --comprising--; and "said" second occurrence has been changed to --a--,  
Line 19, "comprises" has been changed to --comprising--.

2. The following is an examiner's statement of reasons for allowance: for claims 7 and 21, the prior art does not teach a machine for securing a border wire on a mattress inner spring, the machine comprising a support having a first portion against which one edge of the mattress inner spring and border wire rest and a second portion against which one side of the mattress inner spring and border wire rest, a clip applicator feed system comprising a track along which strips of clips travel, the track having a first feed end into which an operator feeds strips of clips and a second clip applicator end operably connected to a clip applicator for supplying the clips to the clip applicator, wherein the first feed end of the track is accessible to an operator through the second portion of the support, these in combination with the rest of the limitations in the claims.

For claims 9 and 23, the prior art does not teach a machine for securing a border wire on a mattress inner spring, the machine comprising a clip applicator feed system comprising a track along which strips of clips travel, the track having a first feed end into which an operator feeds strips of clips and a second clip applicator end operably connected to a clip applicator for supplying the clips to the clip applicator, wherein the track includes at least one clip feed device which moves the strips of clips along the track, the clip feed device comprising an air cylinder, these in combination with the rest of the limitations in the claims. For claim 13, the prior art does not teach a machine for securing a border wire on a mattress inner spring, the machine comprising a clip applicator feed system comprising a track along which strips of clips travel, the track having a first feed end into which an operator feeds strips of clips and a second clip applicator end operably connected to a clip applicator for supplying the clips to the clip applicator, wherein the track includes a pair of feed devices which move the strips of clips along the track, and a low clip sensing device, disposed between the pair of clip feed devices, which senses a low clip condition of the clip applicator feed system, the clip feed devices comprising air cylinders and the low clip sensing device comprising a proximity switch, these in combination with the rest of the limitations in the claims. For claim 27, the prior art does not teach a machine for securing a border wire on a mattress inner spring, the machine comprising a clip applicator feed system comprising a track along which strips of clips travel, the track having a first feed end into which an operator feeds strips of clips and a second clip applicator end operably connected to a clip applicator for supplying the clips to the clip applicator, wherein the track includes
